

*NEW - SILVER PLUS

An additional program option for clients with stubborn weeds like wild violet, creeping charlie, and ground ivy.

A new offering from Earthscapes lawn and garden utilizing a new product, that has been tested with outstanding results.

In the 2014 turf season, Earthscapes used Q4 herbicide on a trial basis on selected lawns that have specific weed problems that our typical broadleaf weed herbicide was not able to eradicate.

We are pleased to announce that last year, our results with Q4 product were OUTSTANDING, and we are now introducing usage into our 3 available programs as a new, fourth option. We call this new option the “Silver Plus” program and it fills a niche of offering a wider range of weed control and a boost to crabgrass control, for just a little more money.

If “Silver Plus” appeals to you, simply select it on your contract, and we’ll take it from there.

Please call with any questions or comments you might have about this exciting new offering: 570-854-2437
